## What is a take back program?

Take back programs give manufacturers the physical responsibility for products or packaging at the end of their useful lives. By accepting used products, manufacturers can acquire low-cost feedstock for new manufacturing or remanufacturing activities, and offer a value-added service to buyers.

## What is a take back program?

*Take back programs give manufacturers the physical responsibility for products or packaging at the end of their useful lives. By accepting used products, manufacturers can acquire low-cost feedstock for new manufacturing or remanufacturing activities, and offer a value-added service to buyers.*
